PROFESSIONAL SUMMARY

Results-driven Data Analyst with an MSc in Advanced Computer Science (Data Science) and hands-on experience in SQL querying, Python-based data wrangling, and interactive dashboard development using Tableau and Power BI. Skilled in translating large, complex datasets into actionable business insights through statistical analysis, KPI reporting, and exploratory data analysis (EDA). Proven ability to communicate data-driven findings to both technical and non-technical stakeholders. Oracle Cloud Infrastructure (OCI) Foundations Certified (2025).

TECHNICAL SKILLS

Languages & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (CTEs, Window Functions, Subqueries, Joins), R

Data Visualisation: Tableau, Power BI, Matplotlib, Seaborn

Analytics & Methods: Exploratory Data Analysis (EDA), Statistical Analysis, KPI Reporting, A/B Testing Concepts, Cohort Analysis, Data Wrangling, Predictive Modelling, Regression Analysis, Data Storytelling

Cloud & Tools: Oracle Cloud Infrastructure (OCI), Jupyter Notebook, Git, MS Excel (Pivot Tables, VLOOKUP), PostgreSQL, Linux

EDUCATION

MSc Advanced Computer Science with Data Science

2023 – 2025

University of Strathclyde — Glasgow, UK

Core Modules: Big Data Analytics, Machine Learning, Statistical Methods, Advanced Programming

B.E. Computer Science and Engineering

2019 – 2023

Misrimal Navajee Munoth Jain Engineering College — Chennai, India

Core Coursework: Database Management Systems (DBMS), Data Structures & Algorithms, Computer Networks

PROJECTS

Sales Dashboard Analysis | Python · Pandas · Matplotlib · Jupyter

- Cleaned, processed, and analysed 9,994 retail sales records spanning 4 years using Python (Pandas) to support data-driven business decisions.
- Designed a 6-chart interactive dashboard uncovering 47% revenue growth and regional KPI performance trends — translated complex data into clear stakeholder-facing insights.
- Identified the Tables sub-category as a \$17,725 loss driver through correlation analysis ($r = -0.22$ between discount and profit), providing actionable pricing recommendations.

Social Media Marketing Analytics | SQL · PostgreSQL

- Built an end-to-end marketing analytics pipeline using advanced SQL (CTEs, window functions, cohort retention queries) across 6 normalised relational tables.
- Analysed campaign performance, user engagement metrics, and content effectiveness to quantify ROI — mirroring a real-world Marketing Data Analyst workflow.

Smart Fashion Recommender System | Python · Scikit-learn · Pandas · Git

- Developed a machine learning recommendation system on 10,000+ user records via EDA, feature engineering, and collaborative filtering techniques.
- Evaluated multiple models through hyperparameter tuning, achieving a Precision@5 score of 0.87 on the top-performing model.

Visualisation of Logical Cyber Security Arguments (ePassport Security) | Python · Tableau · Wrangling

- Collected, cleaned, and processed structured security datasets, reducing data inconsistencies through robust data wrangling best practices.
- Built interactive visual dashboards to present complex security data findings to non-technical stakeholders, significantly improving data interpretability.

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) Foundations Certified — Oracle (2025)
- Data Analytics & Science Job Simulations — Deloitte, Lloyds Banking Group, Tata (GenAI Powered) (2026)
- Financial & Corporate Job Simulations — JP Morgan Chase (Quantitative Research & Investment Banking)
